Descriptive Geometry, as Applied to the Drawing of Fortification and Stereotomy (Paperback)

By Dennis Hart Mahan

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1872 Excerpt: .of a given semi cylinder by a vertical plane, the diameter A B being horizontal, and suppose the bounding elements through A and B to be limited at a horizontal plane at the distance A A below A B , and to pierce this plane at the points JE and D, on a line parallel to AB and at a given distance from it; these elements being oblique both to the vertical plane and to the horizontal plane, and therefore not projected on either into their true lengths. Let LM be the axis, and JED a bounding element of another semi cylinder, the right section of which is a semicircle; LM and JED being also in the given horizontal plane. It is proposed, with these data, to find the lengths of the elements of the oblique cylinder intercepted between the vertical plane of A B C...

Reviews

This is basically the greatest book i have got read through until now. It normally will not expense an excessive amount of. I am just delighted to let you know that here is the greatest book i have got go through within my individual existence and might be he finest book for at any time.
-- Precious McGlynn

A very amazing publication with perfect and lucid information. We have read through and that i am certain that i will planning to study once more yet again in the future. You will not really feel monotony at anytime of the time (that's what catalogues are for about should you question me).
