HOW TO DEVELOP CHILDREN AS RESEARCHERS: A STEP-BY-STEP GUIDE TO TEACHING THE RESEARCH PROCESS

[DOWNLOAD](#)

SAGE Publications Ltd. Paperback. Book Condition: new. BRAND NEW, How to Develop Children as Researchers: A Step-by-Step Guide to Teaching the Research Process, Mary Kellett, 'This book will be really useful to all teachers of upper Primary/lower Secondary pupils but will be especially useful as a resource for using with gifted children of 9 to 12 years, as it will promote and support the type of self-directed, investigative enquiry that they enjoy. The author also emphasises the importance of the research process rather than the written product, which will appeal to all those children who dislike the written presentation of work! Each chapter outlines the learning outcomes, has a timed teaching content, and suggests a core activity; it also suggests differentiation and includes some simple 'games'. It is fully supported by photocopiable resources, making it a complete programme of work. Although written for a specific age group, this is such an excellent basic guide, it would be of use to anyone conducting research for the first time' - Eve Wilson, Education Consultant, National Association for Gifted Children 'This inspirational and innovative programme will be welcomed by all those who want to teach research skills to children. Clear discussion notes, activities and games provide everything a busy teacher needs to be able to deliver the programme. No prior knowledge of research is necessary. This is an ideal resource for those who want to offer pupils the opportunity to make their voice heard through the research process' - Dr. Ruth MacConville, Head of SENS, London Borough of Ealing 'An excellent book. a very informative guide to supporting teachers in delivering a comprehensive research training package to children and young people' - Children & Society Why teach research methodology to children? An effective and meaningful way of enhancing children's learning, doing research, empowers children to...
