NEW MEXICO. By F. A. Jones, E. M. , C. E. , LL. D. Field Assistant of United States Geological Survey, Albuquerque, X. Mex. The work in collecting the production of the precious metals of New Mexico for the year 1902 has been carried out by personal inquiry and visit into every mining camp and district in the Territory. In many respects the results for the year in question are disappointing, but from a standpoint of scientific and intelligent mining and metallurgy which is now receiving the attention of operators generally throughout the more prominent camps, the outlook for the future is, indeed, very promising. While the production of gold and silver will always contribute materially to the wealth of New Mexico, the real greatness of its mineral values lie in its extensive coal and iron deposits. New...
