It can be clamped to an ordinary school desk, or a shelf, and be released by a single turn of a thumb-screw. The desk-top consists of a board sixteen inches wide and twenty-four inches long, with a recess at the back, which is fitted with blocks and racks of various forms for holding the tools in their proper places. It is provided with a stop, which is used for holding the wood while planing. This stop, when not in use, can be dropped down flush with the surface, and the top may then be used as a drawing board.
