To read **Metabolism and Practical Medicine Volume 3 (Paperback)** eBook, please refer to the hyperlink beneath and download the file or have accessibility to additional information that are have conjunction with METABOLISM AND PRACTICAL MEDICINE VOLUME 3 (PAPERBACK) book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: .in the output of urea as the result of free water-drinking under certain conditions. From this is argued an increase in the processes of oxidation, while colour is lent to the idea from the undoubted action of alkalis in promoting the oxidation processes in the chemical laboratory. In this way might the value of water-cures in obesity, gout, and diabetes be explained; for the stimulation of the oxidizing processes should increase the fat balance, the formation of urea from uric acid, and the process of glycolysis and oxidation of sugar. A.--PLAIN WATER. Water-drinking undoubtedly affects the consumption of energy, but only to a slight extent, and quite temporarily; very large quantities of water must be taken to produce even this slight effect. At present the potential energy exerted by the intestines in absorption, the heart in circulation, or the glands in excretion of the additional bulk of water cannot be estimated. Bidder and Schmidt (6) found in a cat that the inorganic balance (measured by CO₂) was not increased by drinking very large quantities of water. Loewy (7) confesses that the slight increase in the oxygen consumption he found in the human subject after small amounts of cold water (100 c.c.) were quite within the limits of experimental error. Speck (8) made an interesting observation: If a large quantity of water is drunk at intervals during the night before the experiment (which was carried out before breakfast), it does not affect the oxygen consumption, CO₂ output,...
